

CREATING SLIDESHOWS IN iPHOTO AND PHOTOS

iPhoto

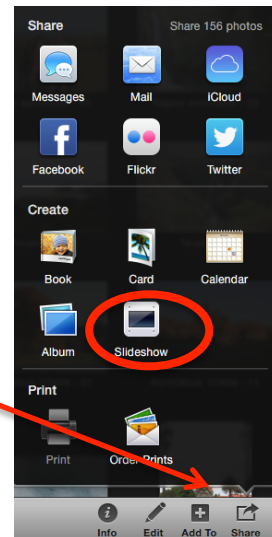

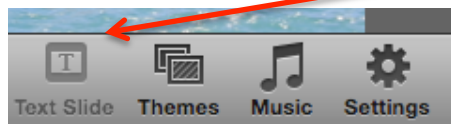

1. Open iPhoto and select the photos you wish to put into a slideshow

TIP: It may be easier to put the selected photos into a folder

2. Click **Share** (bottom right corner of screen) and then **Slideshow**

3. Now select the Theme, music and other settings for your slideshow (eg duration, transitions)

You can also add text to each slide by highlighting the slide and then clicking on the Text Slide icon

The Slideshow will be saved under Slideshows in iPhoto and can be uploaded to Youtube, Facebook etc or played with Quicktime.

PHOTOS

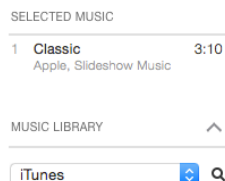

1. Open Photos and select the photos you want in your slideshow.
2. Click on the + at the top right of the screen
Select Slideshow and name it.
3. You can preview the slideshow at any time by clicking the Preview button

4. On the right hand side of the screen are three icons

Theme Picker

Music

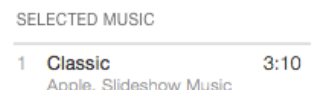

Duration Settings

Click on **Music Library** to see all your own music in iTunes

TIP: when you have selected the music you want on your slideshow be sure to remove any previously selected music (roll the cursor over the name of the selected music and a X will appear – click it to remove the music)

The slideshow when completed can be Exported (top right of screen) to view in Quicktime or send to Youtube or Facebook etc. It can also be burned to a CD to give to family
